Automation is the technology by which a process or procedure is performed with minimal human assistance. Automation or automatic control is the use of various control systems for operating equipment such as machinery, processes in factories, boilers and heat treating ovens, switching on telephone networks, steering and stabilization of ships, aircraft and other applications and vehicles with ...Coefficient of discharge is stated as the ratio between the actual flow discharge and theoretical flow discharge. It is also referred to as the ratio of mass flow rate at nozzle's discharge edge to the standard nozzle which enlarges an exact working fluid maintained at the similar initial conditions and pressures.Prevent Poor Reads from Single Base Errors Introduced During PCR. NEXTFLEX ® DNA Barcodes are indexed adapters, compatible with Illumina ® platforms, that provide flexibility and high-throughput capabilities in sequencing applications. Multiplexing with NEXTFLEX ® DNA Barcodes significantly increases scale while reducing costs by allowing the user to pool multiple library preparations in a ...Brazing is a metal-joining process in which two or more metal items are joined together by melting and flowing a filler metal into the joint, the filler metal having a lower melting point than the adjoining metal.. Brazing differs from welding in that it does not involve melting the work pieces and from soldering in using higher temperatures for a similar process, while also requiring much ...
