

Download Chemical Sensitivity And Sick Building Syndrome

Sick building syndrome (also termed environmental illness, building-related illness [BRI], or multiple chemical sensitivity [MCS]) is considered by some clinicians to be an illness in some people after they are exposed to as yet undefined chemical, biological, or physical agents that are thought to be found in building(s). Chemical Sensitivity and Sick-Building Syndrome - CRC Press Book Written by multidisciplinary experts in medicine, chemistry, and architecture, this book examines chemical sensitivity (CS). In 15 chapters fitted to 15 lectures, it discusses not only the medical explanation, but also the environmental factors of this hypersensitive reaction, such as chemistry and architecture. Written by multidisciplinary experts in medicine, chemistry, and architecture, this book examines chemical sensitivity (CS). In 15 chapters fitted to 15 lectures, it discusses not only the medical explanation, but also the environmental factors of this hypersensitive reaction, such as chemistry and architectural aspects.
