

Download Hammer Head The Making Of A Carpenter

A large hammer-like tool is a maul (sometimes called a "beetle"), a wood- or rubber-headed hammer is a mallet, and a hammer-like tool with a cutting blade is usually called a hatchet. The essential part of a hammer is the head, a compact solid mass that is able to deliver a blow to the intended target without itself deforming. This beechwood mallet is designed for general joinery work. Mallet has a rectangular, curved head — a design that dates back to when a wheelwright would make a mallet from an old wheel felloe. My old Estwing, hanging out with its stepbrother... In Your Face – The Milled Face vs Smooth Face Hammer Contest Comes To A Head.
