As much as the production of crude oil and natural gas generate enormous costs on the environment, it also directly impacts on the economy of the producing state. The later, among other reasons, is the motive for investing huge capital in the industry. This paper addresses the motives for the production of crude oil and natural gas; identifying the components of these products that are toxic ...François Quesnay (French: [fwaˈkɛsnaˈk]; 4 June 1694 – 16 December 1774) was a French economist and physician of the Physiocratic school. He is known for publishing the "Tableau économique" (Economic Table) in 1758, which provided the foundations of the ideas of the Physiocrats. This was perhaps the first work attempting to describe the workings of the economy in an analytical way ...Petroleum (/pəˈtrɒliəm/) is a naturally occurring, yellowish-black liquid found in geological formations beneath the Earth's surface. It is commonly refined into various types of fuels. Components of petroleum are separated using a technique called fractional distillation, i.e. separation of a liquid mixture into fractions differing in boiling point by means of distillation ...Get Full Text in PDF.
